

WHITEPAPER

Token TREV

Token Revolution

April, 2024

1. INTRODUCTION

The exciting Blockchain world allows the creation of different mechanisms for the launch of projects like the one in question in this case.

A project like **Token Revolution**, based on Project and Asset Tokenization Services, aims to offer all types of investors the possibility of growing in a state-of-the-art and high-tech ecosystem and that these investors can subsequently see their capital increased. Invested with the sale of **TREV Tokens**.

The **Token Revolution** project has international scope and of course has no limits in its technological and commercial development.

Token Revolution offers services that very few companies are doing at this time since it helps entrepreneurs, businessmen and asset owners to finance themselves or generate extra income that allows them to capitalize to be able to produce economic benefits that impact the value of their tokens. direct.

We have been offering and executing this type of Project and Asset Tokenization Services since 2022, and although our history in the world of Security and Blockchain is extensive, there are still many business possibilities and services that we can offer to many clients. We have focused our efforts and enthusiasm on facilitating and helping all types of people with entrepreneurial initiative or with "inactive" assets to capitalize and make profitable their potential.

Types of **Tokenisable Assets**:

This is a technologically disruptive project that is as well as social and humanitarian. A Token that will be issued so that its own launch will even allow its revaluation, that is, an increase in initial value in the cryptocurrency and token market. Anyone who invests in the acquisition of **TREV Tokens** will be able to trade, sell or hold them over time to observe their valuation in the specific token markets.

2. STATE-OF-THE-ART

Currently, very few companies offer the project tokenization service as it is understood, since the majority that have tokenized have done so with their own business project to support their financing or as a Utility Token, that is, as an element of exchange in its environment. We are mainly talking about companies that have developed software in the Blockchain, Web3, etc. environment.

In relation to the tokenization of assets, initiatives and creation of tokens have proliferated, especially in the real estate sector, precious metals and to a lesser extent in the rest.

That is why Token Revolution was born to provide tokenization solutions to clients and does not stop creating its own Token to offer investors the possibility of participating in this project already in operation and with an enormous capacity for international expansion.

In the following graph we can see the evolution of asset tokenization and intuit the growth of RWA (Real World Assets) and its potential.

According to **STOBOS**, the tokenization market in Europe will have exponential growth:

And according to the **Frankfurt School Blockchain Center**, the market for Tokenization companies is as follows:

Tokenization companies by country

This last graph is telling us that there are very few companies that are dedicated to tokenization, so it indicates the great opportunity of a new rising market.

3. TREV TOKEN LAUNCH PLANNING

The launch of the **TREV Token** is directly linked to the **TOKEN REVOLUTION** project consisting of offering Project and Asset Tokenization Services for companies and owners. We could call it the "Token of Tokens".

TOKEN TREV: PROJECT FINANCING

Through the sale of **TREV tokens** this very beneficial project can be launched and executed. We are also aware that whoever invests in the Token will know that the objectives will be met with great precision since an entire economic feasibility study has been carried out that truly guarantees its success.

The aim is to create a **TREV community** around this project that will expand to other countries.

It should be noted that the **TREV Token** itself will have its own journey and at the same time will be enhanced by the company's philanthropic activity, allocating a part of the income obtained from the sale of **TREV tokens** to tokenize Startup projects of young entrepreneurs.

A group of experts will be the ones who will technically ensure that the TREV TOKEN will have the appropriate consensus, performance guarantees and technological security.

An ecosystem will also be created that will allow the exchange of TREV tokens within the Foundation's services and events and promotions for its owners, who will obviously have advanced and special preferences and functions. A treatment that will also increase depending on the progress in the sale of **TREV TOKENS**.

4. OBJETIVES

TREV wants to establish itself in this sector as an innovative, supportive, humanitarian and highly expanding project.

The main objectives are:

4.1. GENERATION OF A GLOBAL ECOSYSTEM FOR THE PROJECT AND ASSET TOKENIZATION SERVICE

It is important to generate the development of service projects with positive results for all those involved, from clients, asset owners and finally investors in **TREV Tokens**. Of course without discarding the philanthropic and aid objectives of the company, allocating a part of the income obtained from the sale of TREV tokens to tokenize Startup projects of young entrepreneurs.

4.2. CREATION OF A SYSTEM OF ALTERNATIVE BLOCKCHAIN SERVICES

The service system is based on their Quality, taking into account that the priority is the CUSTOMER, that is, the entrepreneur, the businessman, the owner of an asset. Tokenization Services that allow significant capitalization and economic inflow capacity for CLIENTS.

4.3. FINANCING OF AID PROJECTS

This objective for us is one of the most important. Without it all the work and efforts made have no meaning. Currently there are many young entrepreneurs who have good projects and do not have the economic possibilities to start them and traditional financing is complex, tedious and sometimes with abusive conditions. Our goal is to tokenize projects of young entrepreneurs without the cost of our services for the promoter, supporting them from the first minute by contributing 3% of the profits obtained.

5. CONTROL OF THE TREV TOKEN

The **TREV Token** is based on the TRON network which in turn resides on the Blockchain. Tron was born with the objective of being a viable alternative to Ethereum. The problem with Ethereum, like other cryptocurrencies with proof-of-work consensus, is scalability. Having limitations in the ability to process transactions generates high commissions. Tron adds a different mechanism that allows processing a large number of transactions per second.

TRON was first launched in July 2018 by the charismatic and controversial Justin Sun, who has made a name for himself in the market with his fierce statements. The blockchain vision, first conceived in 2017, has been described as "decentralizing the web," although its focus has narrowed in more recent times. The TRON Foundation leads the development of the TRON blockchain and cryptocurrency and, interestingly, , was first available on Ethereum, although it has since been separated. The Tronix token (TRX) was often present in the top 30 cryptocurrencies by market capitalization, although newer coins have demoted it some positions since then. However, TRON's evolution over the years has still kept it relevant.

Some of TRON's main features include its delegated PoS (Proof of Stake) consensus algorithm, its single token standard that supports a few different types, including an NFT one, and its ecosystem of DApps.

As for its DApps, the TRON ecosystem includes a DEX, a blockchain explorer, a wallet, a lending platform, and a decentralized oracle, among other applications. In more recent months, TRON has also trended towards decentralized finance (DeFi), with some applications supporting related services.

Thus, the network standard that TREV is going to use is very expanded today and therefore guarantees security and operation and it is also an energetically sustainable system since it does not require large infrastructure and therefore high energy consumption.

TRX Symbol (TRONIX)

6. TOKEN LAUNCH

General data:

1. NUMBER OF TOKENS: 600.000.000 TREV.
2. PRICE: 1 TREV=0,01 USD
3. PRE-LAUNCH: 50% OFF
4. MINIMUM NUMBER OF TOKENS: 20.000 TREV (100/200 USD)

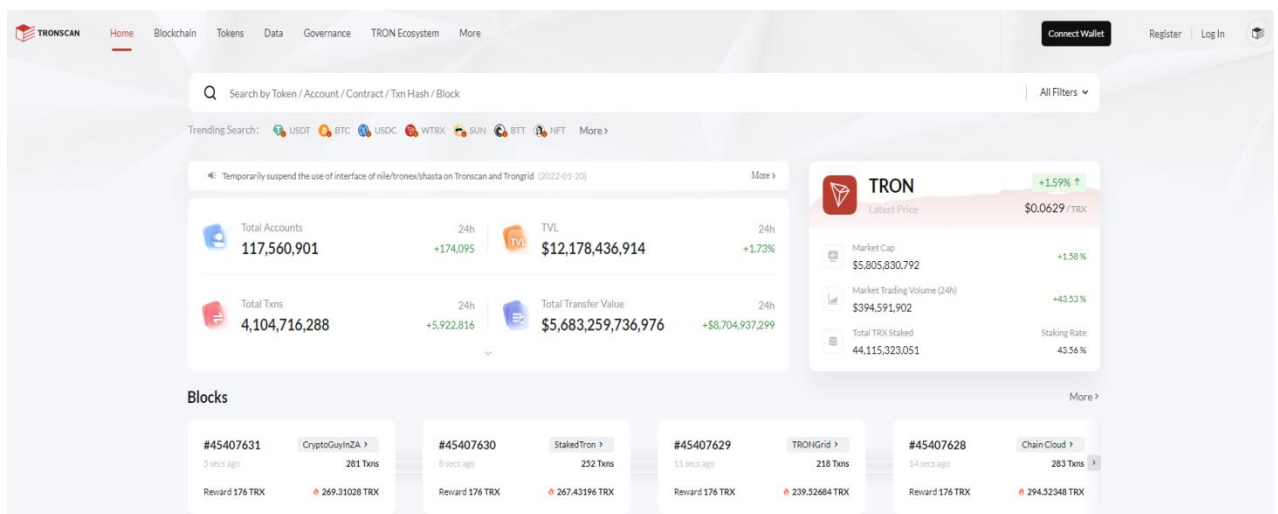

TOKEN symbol:

"TREV"

Protocol: TRON

Blockchain check: Tronscan: "tronscan.org"

Visualizer of the TRON Blockchain

5% of the total TREV will also be reserved for external consultants.

7. INVESTMENTS AND TRANSPARENCY

Values in EUROS

INVESTMENTS	HOME ACTIVITY	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5
SERVERS AND IT EQUIPMENT	50.000	15.000	3.000	6.000	100.000	4.000
ACCESSORIES	5.000	1.500	300	600	10.000	400
TECHNICAL FURNITURE	1.500	4.500	900	1.800	30.000	1.200
REGISTRATIONS, LICENSES	6.000	6.300	6.360	6.480	8.480	8.560

10. WHO WE ARE

We are a group of multidisciplinary people who complement our work to give greater energy to an ambitious and totally profitable project in the medium term that will change the way the concept of integration and Service is understood.

Our experience in technological fields (security, telecommunications, information technologies, etc.), economic, historical and artistic fields mean that the synergies between us are very high.

On the other hand, there is also the entire human part that we will indirectly benefit with the profits and benefits produced by the business.

We are a group of professionals, telecommunications engineers and designers specializing in cybersecurity and specifically in the field of blockchain cryptography and cryptographic assets since 2016, with extensive experience and knowledge in the sector.

Our team is committed to providing innovative and secure solutions for the issuance of Tokens, Audiovisual Systems and artificial vision with AI since 2019, adapted to the needs of our clients.

We work transparently and efficiently, guaranteeing the trust and satisfaction of those who trust us to carry out custom tokenization projects.

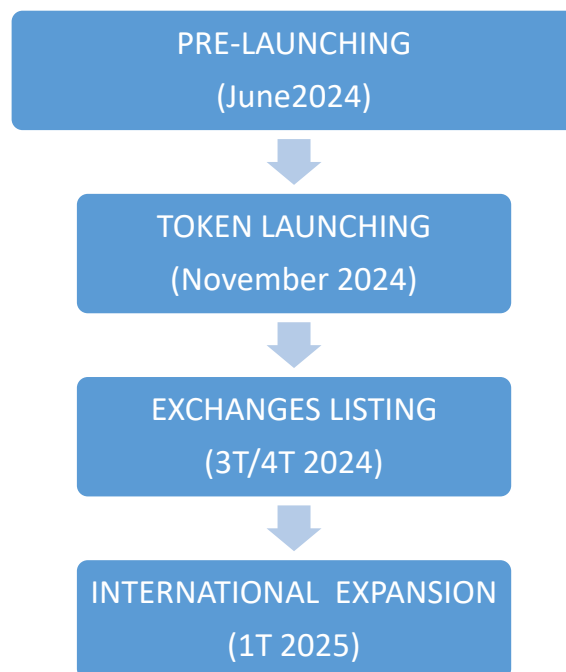

11. PROJECT GUARANTEES

In the cryptocurrency and token sector, it is increasingly intended that any project that comes to light has the legal, legal and economic solvency guarantees to be able to face it, and that any buyer of the investment token has peace of mind in a very high factor.

That is why **Token Revolution** intends to use the assets that the company acquires to somehow make backup reserves.

12. PLANNING

The **TREV Token** is under development and the following deadlines will be met approximately depending on how the service project also evolves.

13. LEGAL NOTICES

Currently the **TREV Token** is backed by the **TOKEN REVOLUTION** (see www.tokenrevolution.net).
